Career academies are designed to prepare students for both college and careers. They are schools within schools that link students with peers, teachers, and community partners in a structured environment that fosters academic success. The career academy concept has three key elements: a small learning community (SLC), a college-prep sequential curriculum with a career theme and an advisory board that forges partnerships with employers, higher education institutions, and the community. Career Academies are for everyone. Academies provide students with interesting, unique, and fun experiences whether you're headed off to college after high school or if you plan to begin employment right away. When you enroll in a Career Academy, you'll have the opportunity to earn college credit (for free) and even earn an industry certification.

For more information about Academies please contact the high school or the Career and Technical Education office (CTE) at 904-336-4500.
